

TECHIEYAN TECHNOLOGIES

16-11-16/V/24, Sri Ram Sadan, Moosarambagh, Beside RTA Office, Malakpet, Hyderabad 500036

ML PROJECTS

1. Chronic Kidney Disease Prediction using M.L Algorithms
2. Identifying the type of skin cancer using Machine learning
3. Making a Machine to predict whether a person is affected which Heart Disease or Not.
4. Predicting the trend of the house prices with United States housing data and Regression models
5. Identifying weight category of person using Random Forest
6. Credit card fraudulent detection using Machine Learning through financial data.
7. Helping patients know whether they are diabetic or not using Machine Learning
8. Heart Disease Prediction using Machine Learning
9. Identifying male or female based on voice using XGBoost and ML
10. Tic Tac Toe Game with AI Integrated and Front End Framework
11. Road Transportation Analysis and Statistical modelling.
12. Making the Data Balanced without any Bias to avoid Overfitting and making wrong predictions.
13. Making Machine identify a covid affected person using supervised learning approach
14. Score prediction of IPL team with flask app
15. How does the Market Behave in future?
16. Contact tracing of covid affected person using DBSCAN Clustering methodology
17. Tic Tac Toe Game with AI Integrated and Front End Framework
18. Road Transportation Analysis and Statistical modelling.
19. Network Severity detection at a specific location based on log data available
20. Personality Detection based on Hand Writing using Machine Learning
